FR

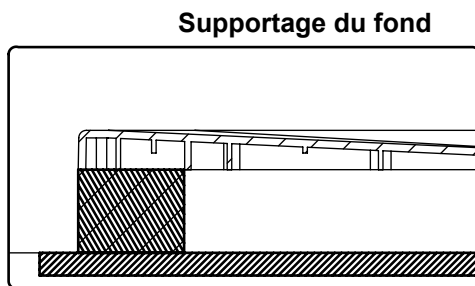

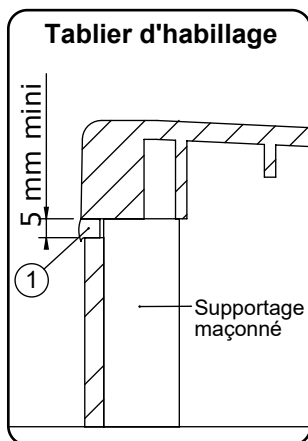

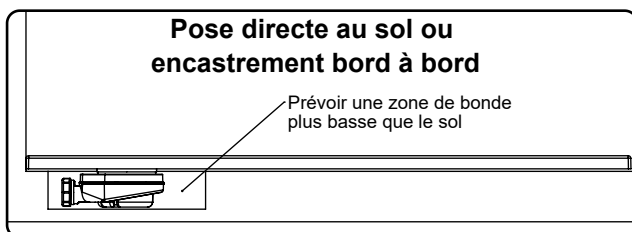

Tracer la position de la bonde et réaliser un montage à blanc de la bonde et du receveur

- ① - silicone de finition traité antifongique de 5mm de largeur minimum
- ② - silicone d'étanchéité souple traité antifongique
- ③ - élément de soutien du joint silicone
- ④ - silicone d'appui

Il est indispensable d'avoir un support imputrescible sur tous les côtés du receveur.

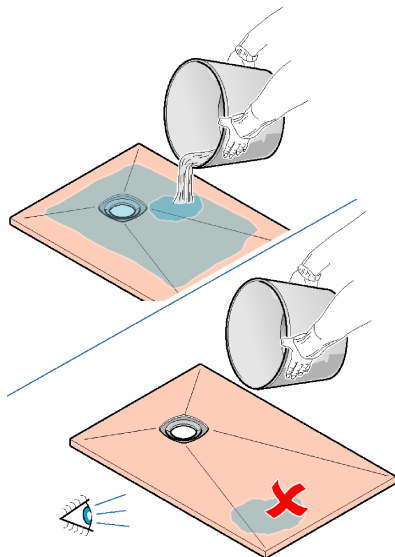

Pendant toute la durée des travaux, protéger le receveur contre toute agression : brûlures, chocs, rayures, décapants...

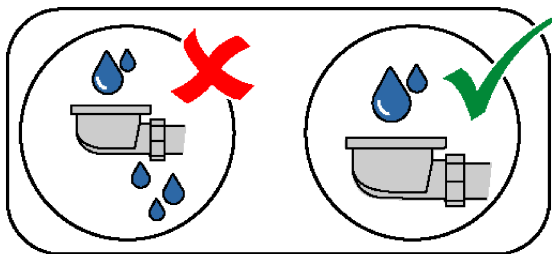

Le montage d'une *soupape anti-vide* est nécessaire pour une utilisation optimale si un autre appareil sanitaire est raccordé sur la même évacuation.

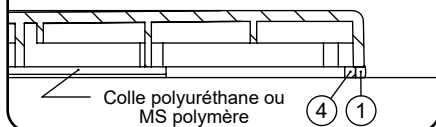

Sol rigide et non humide indispensable.

Ne pas poser sur plancher chauffant.

Mark the position of the plug and perform a  
White mounting the bung and recipient

- ① - finishing antifungal treated silicone minimum width of 5mm
- ② - flexible sealing silicone treated antifungal
- ③ - support Element silicone seal
- ④ - silicone support

It's essential to have a rigid support on all sides of the shower tray

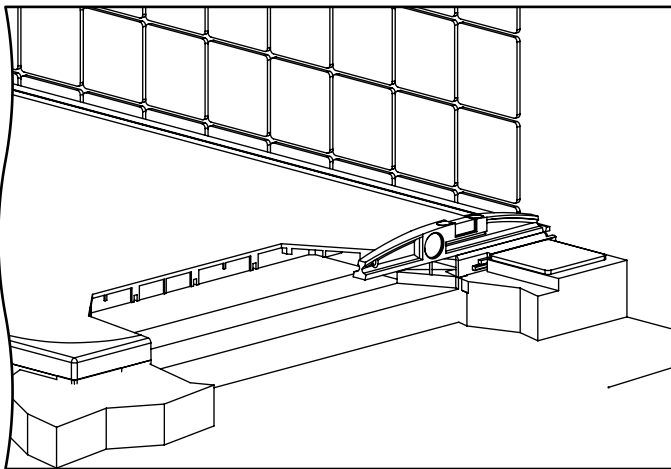

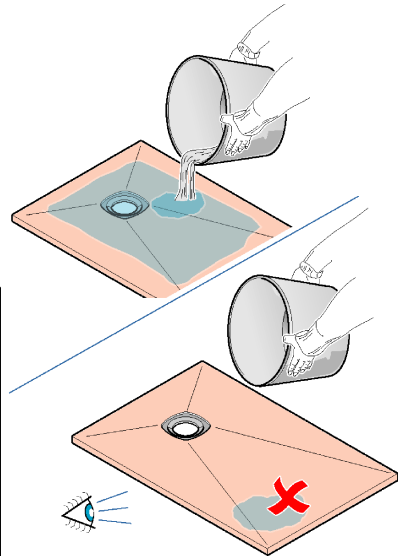

Throughout the duration of the work, protect the recipient against any aggression : burns, shock, scratches, strippers...

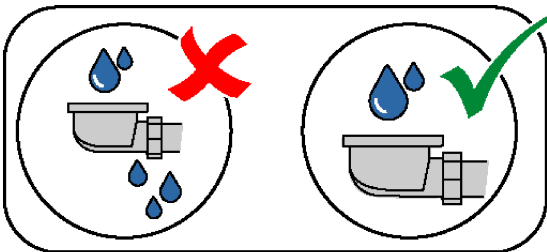

The installation of an anti-evacuation valve is necessary for optimum use if another sanitary appliance is connected to the same evacuation

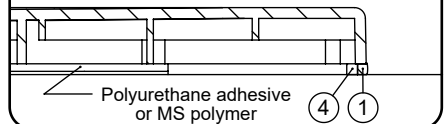

The underlying floor must absolutely be rigid and dry / Ensure a solid dry surface

Do not place on underfloor heating.

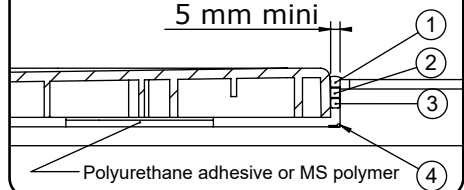

### Direct floor installation

### Recessed edge to edge
